

VEX V5 Override: Session 7 - Inspection

Activity: Complete a robot inspection.

Your team will need to bring their robot for inspection at the start of the competition. The robot must pass inspection in order to compete in matches.

1. Bring your robot to the inspection area.
2. The inspector should check each item on the robot inspection checklist to make sure that your robot is in compliance with the rules.
 - Refer to the [game manual](#) to help answer any questions about rules for inspection.
 - Team members should be present to answer questions during the inspection.
 - Make sure that you have your license plates available at inspection, and know where they will be positioned on your robot.
3. Note any Action Items from inspection that you want to address before the competition below.

Action Items from Inspection:

-

Discussion Questions

- Were there any surprises from the inspection checklist that we didn't expect? How will we address them before competition?
- How can we find the answers to any questions we have about inspection?
- Do we feel like we can confidently pass inspection at the competition?
