License Plate Template

At VEX IQ Robotics Competition events, teams must display 3.5" x 1.5" (88.9mm x 38.1mm) license plates with the team number on two opposing sides of their robot. Two robot license plates are included in the Welcome Kit sent to an organization when they register their first team.
VEX IQ license plates can also be ordered from VEX Robotics: vexrobotics.com/228-7401

You can print this template for robots that require license plates to pass robot inspection at an event.
